TEST BEFORE YOU TREAT !!!

With worm resistance rising, performing a faecal count (FEC) and a faecal count reduction test (FECRT) is crucial for maintaining our horse's long-term health.

Without this information, worming can be costly and ineffective.

While you may worm your horse every 6-12 weeks, do you know if you need to?

Or if your worming products are effective?

A faecal egg count provides the answers.
